Ziying Wang (Audrey)
+86 18121435676 · ziying.wang@dukekunshan.edu.cn

EDUCATION

Duke Kunshan University (DKU) & Duke University Dual Degree Class of 2027
B.S. in Computation and Design; Computer Science Track (DKU) Kunshan, China
B.S. in Interdisciplinary Studies; Computation and Design; Computer Science (Duke) Durham, U.S.
Cumulative GPA: 3.816/4.00

PUBLICATIONS

Peer-Reviewed Publications

- Li, Molin*, **Ziying Wang***, Yifan Zhao, Lik-Hang Lee, Ray LC, and Xian Xu. "QualiaSkin: Exploring Movement Quality through Configurable Animal Avatars." Under review at the ACM CHI Conference on Human Factors in Computing Systems (CHI 2027). (**Equal Contribution*)

RESEARCH EXPERIENCE

Research on Human–AI Co-Performance in Game Livestreaming (Co-First Author) May 2026 - Present
Student Research Assistant to Dr. Zhicong Lu, George Mason University *Fairfax*, VA

- Investigated how conversational AI becomes a co-performer in game livestreaming through an in-situ study with 12 professional streamers, yielding 37 hours of recordings and 1,428 interaction episodes.
- Developed and applied a multi-label video coding framework to characterize streamer–AI interaction forms and response strategies, including intercoder reliability analysis.
- Conducted clip-based stimulated-recall interviews and qualitative analysis to examine how streamers negotiated AI roles, relationships, control, and public self-presentation.
- Co-authored the manuscript, contributing to research framing, manuscript writing and publication figure design.

Research on Designer-in-the-Loop Generative UI Authoring (Second Author) May 2026 - Present
Student Research Collaborator with Dr. Jason Wu, Purdue University *West Lafayette*, IN

- Contributed to GUIDE, a designer-in-the-loop Figma system that enables UI/UX designers to iteratively steer generative interfaces toward a target design language through generation, selection, and editing.
- Built and tested the GUIDE Figma plugin in TypeScript/Preact, implementing the end-to-end interaction workflow for reference artboards, candidate generation, on-canvas editing, designer selection, and feedback capture across iterative design rounds.
- Contributed to the manuscript by creating publication figures and writing the related-work section on UI generation, design intent, and generative alignment.

Research on AI-Supported Rehearsal for Stand-Up Comedy Performance (Second Author) Jan 2026 - Present
Student Research Assistant to Dr. Zhicong Lu, George Mason University *Fairfax*, VA

- Developed Thalia Studio, an AI-supported rehearsal system that connects script writing, recorded performance, moment-level feedback, and video examples within a unified workflow.
- Built the front-end interaction system using HTML, CSS, and JavaScript, including script editing, drag-and-drop material organization, in-browser recording, and moment-level feedback interfaces.
- Designed and conducted a study with 12 comedy performers, combining semi-structured interviews with SUS- and Creativity Support Index-based measures.

Research on QualiaSkin: A Movement-Quality Design Space for Dance (Co-First Author) May 2025 - Present
Student Research Assistant to Prof. Xian Xu, Lingnan University *Hong Kong*, China

- Co-developed QualiaSkin, a Kinect-based interactive system for real-time movement exploration with eight animal avatars and configurable body-to-avatar mappings.
- Conducted Study 1 with 16 professional dancers, combining embodiment measures, interviews, and MediaPipe-based kinematic analysis to examine changes in bodily coordination.
- Conducted Study 2 with three LMA-trained experts, using blinded movement-quality ratings and statistical analysis to evaluate differences across avatar conditions.
- Led the manuscript preparation, including research framing, data analysis, figure design, and full-paper writing.

Research on Multi-modal Generative AI for Emotional Awareness (Co-First Author) May 2025 - Jan 2026
Student Research Assistant to Dr. Yucheng Jin, Duke Kunshan University *Kunshan*, China

- Led the development of EmotiStage, a multimodal generative-AI system that transforms users' emotional reflections into interactive musical performances to support emotional awareness.
- Built the full-stack system using Vue.js and FastAPI, integrating LLM, music-generation, and image-generation models into a real-time text-to-performance pipeline.
- Designed and conducted a mixed-methods user study, combining standardized scales, semi-structured interviews, quantitative analysis, and thematic analysis.
- Led the manuscript writing, resulting in a full paper published at ACM ICMI 2026.

Research on AI-Generated Abstract Art for Mobile Wallpapers June 2024 - Nov 2024
Student Research Assistant to Dr. Yucheng Jin, Duke Kunshan University *Kunshan*, China

- Investigated how users perceive and accept AI-generated versus human-designed abstract mobile wallpapers through controlled preference and evaluation experiments.
- Analyzed data from 34 participants using Stata, including binomial tests, paired t-tests, and linear regression to examine preference patterns and individual differences.
- Contributed to the analysis, writing, and revision of the resulting peer-reviewed conference paper.

ADDITIONAL INFORMATION

Languages: Mandarin (Native), English (Professional Working Proficiency)

Research Methods: Mixed Methods, Experimental & Field Studies, Semi-Structured Interviews, Stimulated Recall, Thematic Analysis, Video Coding, Usability Evaluation

Data Analysis: Statistical Analysis (Python, Stata), Kinematic & Behavioral Analysis, Interrater Reliability

Programming: Python, TypeScript, JavaScript, Java, HTML/CSS; Vue.js, Preact, FastAPI

Interactive AI & HCI: LLM/API Integration, Figma Plugin Development, Multimodal Generative AI, Human-AI Interaction Prototyping

Embodied & Creative Computing: Kinect Motion Capture, MediaPipe Pose, Unity, Real-Time Motion Retargeting, Blender

Interests: Violin (Professional)
